

## Education Activity

For the following topics design a way of teaching that lesson. The lesson plans should include how you are going to present the information and how the students will be tested

1. Riding a bike
2. Knowing all the countries of Europe before WWII
3. Knowing the digestive process of a penguin
4. Read a novel and interpret its symbols
5. Planning and executing a meal for the family

Now for each of the lesson plans adjust it for a special needs child but remember you still have a class full of students who are not special needs

1. Riding a bike (blind)
2. Knowing all the countries of Europe before WWII (dyslexic)
3. Knowing the digestive process of a penguin (student has childhood arthritis and can't manipulate small objects well)
4. Read a novel and interpret its symbols (reads on a 4<sup>th</sup> grade level)
5. Planning and executing a meal for the family (paralytic)

Budget Cuts have hit! Decide how you are going to teach these subjects without some of the resources you had before

1. Riding a bike (sorry no actual bikes)
2. Knowing all the countries of Europe before WWII (no paper or new maps)
3. Knowing the digestive process of a penguin (no computers, no markers, no pencils, and no paper)
4. Read a novel and interpret its symbols (sorry book order cut in 1/2 so only enough for every other student to have a book and no paper)
5. Planning and executing a meal for the family (no actual food can be purchased)
